SKILL	1ST QTR	2ND QTR	3RD QTR	4TH QTR
BVM / Airway Adjuncts				
Combitube				
CPR / AED				
Patient-Assisted Medications (Epi-Pen, Nitro, Inhalers)				
Manual Vitals Signs				
<i>Integrated Scenario**</i>				

Evaluator, Please date and sign at each skill.

** During the integrated scenario, the evaluator should present a realistic scenario for the technician to handle. Using a medical or trauma patient, the technician should use good patient assessment skills to evaluate the patient and then make appropriate decisions based on the assessment. The scenario should be complex enough that multiple skills will be demonstrated. The scenario should be real as possible, and the technician should actually perform ALL skills indicated. This evaluation challenges the technician ability to integrate multiple skills into the overall patient management scheme.
