Pediatric Intubation				
Nasotracheal Intubation				
Defib / MegaCode / Pacing				
IV / Saline Locks / Meds				
Combitube/ LMA/ Rapid Sequence Intubation (if applicable)				
Intraosseous / Easy IO				
Chest Decompression				
External Jugular IV				
<i>Integrated Scenario**</i>				

Evaluator, Please date and sign at each skill.

** During the integrated scenario, the evaluator should present a realistic scenario for the technician to handle. Using a medical or trauma patient, the technician should use good patient assessment skills to evaluate the patient and then make appropriate decisions based on the assessment. The scenario should be complex enough that multiple skills will be demonstrated. The scenario should be real as possible, and the technician should actually perform ALL skills indicated. This evaluation challenges the technician ability to integrate multiple skills into the overall patient management scheme.

MUST BE EVALUATED BY ONE OF THE FOLLOWING:

- PARAMEDIC
- OPERATIONAL MEDICAL DIRECTOR
- PUBLIC SAFETY TRAINING COORDINATOR
- OMD APPROVED EVALUATORS
