Summary

- 6,904 homes and businesses will be served by EOY
- 560 miles of Broadband plant constructed
- \$32M+ investment in broadband infrastructure (\$6.3M from the County)
- Broadband is available to support future growth
- Shentel appreciates and values its partnerships with the County, State Office of Broadband and utility partners (VDOT, AEP)
- Shentel is thrilled to bring this project to its successful completion
- Shentel is committed to continuing its longstanding tradition of growth and innovation in Franklin County.

Inquiry was made as to whether delays associated with the railroad and park service will impact closeout of the project. Mr. Steve Sandy responded that it should not negatively impact closeout. Mr. Carl Caudill with the Virginia Department of Housing and Community Development, added that if they are unable to get past these obstacles before year-end, that there can be a conditional closeout.

Rob Mann from AEP indicated that AEP values the partnerships developed with both Shentel and the County. He offered a few fiber updates on the middle mile portions (Snow Creek and Blue Ridge districts), indicating the fiber install is 95% complete. He briefly discussed status of pole replacements. There was brief discussion concerning AEP's testing anticipated in 2026 versus Riverstreet's separate testing processes.

Marshall Jamison inquired about status of Buffalo Ridge Road in the Blue Ridge district. Mr. Mann will check into it and will provide information.

Rob Taylor from RiverStreet touched briefly on the testing process before presenting the following:

QUESTIONS

Mr. Taylor touched on when marketing efforts will begin.

Mr. Steve Sandy provided a brief BEAD update:

Franklin County BEAD Update

December 16, 2025

- **Virginia (DHCD) has received Federal approval of the state's BEAD award recommendations.**
- **In Franklin County, DHCD selected 5 internet service providers.**
 - **Amazon LEO won 6 locations**
 - **Citizens Telephone won 19 locations**
 - **RiverStreet won 112 locations**
 - **SpaceX (StarLink) won 217 locations**
 - **ZiTEL won 2,274 locations**
 - **Total of 2,628 locations.**

- The total award across these internet service providers in Franklin County was \$5.6 million.
- DHCD will directly manage these projects but will regularly report on project progress to the County in partnership with the internet service provider.
- DHCD will sign contracts with these providers in Spring 2026, and construction will begin shortly thereafter.
- Statewide, over \$545M in awards will reach the last 133,000 homes, businesses, and community anchors without a project underway for broadband access.
- Virginia awaits federal guidance on the remaining BEAD funds, which total over \$800M in funding. Virginia's top priority for these funds remains to expand cellular coverage to dead zones across Virginia.

Mr. Caudill added that they hope to get these under contract by June 2026.

There being no further business, a Motion was offered to adjourn the December 16, 2025, Broadband Authority meeting.

(RESOLUTION #02-12-2025)

BE IT THEREFORE RESOLVED by the Broadband Authority to adjourn the December 16, 2025 meeting at 2:58 PM.

RSN Updates

Franklin County

RSN completed installation of tails for Ingramville. Sandy Level permits have been approved, construction drawings delivered, and contracts are currently in process with construction ramping up this month. Glade Hill permits are approved, with construction drawings in production. Permit drawings are in production for Dry Hill, Oak Level, Snow Creek, and Washburn. LiDAR collection is completed for Dry Hill, Oak Level, and Snow Creek, with field verification completed for Dry Hill and Snow Creek; Oak Level field verification is next, followed by Waysboro. The Waysboro remote survey is complete, and RSN is awaiting scheduling of the title closing to proceed.

APCo Updates

Franklin County

On the Dickinson route, splicing was nearly completed by year-end but experienced delays due to weather and the introduction of new splice trays, which initially slowed progress. These trays will be standardized moving forward, which is expected to improve efficiency. The Sago route installation is complete, with splicing approximately 60% finished; a completion date is pending vendor confirmation. Endicott installation is complete, with crews currently performing cleanup. Make-ready work and most pole transfers are complete, and splicing is expected to begin in January. Ingramville fiber installation is complete, with splicing anticipated to begin in the first quarter, potentially within two to three weeks pending confirmation.

RE: Notice of Substantial Completion Date – Shentel 2022 VATI Project

Dear Steve:

Per section 1.11 of the *Franklin County, Virginia, Franklin County Broadband Authority, and Shenandoah Cable Television, LLC 2023 Agreement to Provide Broadband Services Funded in Part by the Virginia Telecommunications Initiative (VATI)* originally dated October 1, 2022, and amended on August 28, 2024 (collectively, "the Agreement"), Shenandoah Cable Television, LLC ("Shentel") hereby provides Franklin County ("County") notice that December 15, 2025 shall be the Substantial Completion Date.

Shentel's contractual commitment for this Agreement is to provide the Service(s) to 3,508 subsidized passings. As of the date of this letter, Shentel has substantially completed construction of the Services to the subsidized passings associated with this Agreement. When combined with the 612 subsidized passings associated with our 2021 VATI Agreement, 952 County residents have thus far subscribed to Shentel broadband service. This equates to a 23% take rate. Please note, many of these passings have just recently been completed, and Shentel anticipates this take rate to increase significantly in the future.

All of these passings meet or exceed the Service(s) described in section 1.10 of the Agreement. This passing and take rate information shall be supported by Shentel's December submittal to the County of the 2025 monthly CAMS report. Shentel looks forward to working with the County and the State over the next several months to provide further supporting documentation required of the Agreement.

This notice is conditioned on the following exceptions:

1. Shentel was denied access to 67 subsidized passings due to right of way or easement issues (the "Denied Access Passings"). These Denied Access Passings are further described on Attachment A to this notice.
2. While Shentel has substantially completed construction to these locations, Shentel has not fully certified 219 subsidized passings (the "In-flight" Passings). However, Shentel shall fully certify these remaining In-flight Passings within the next thirty (30) calendar days. These In-flight Passings are further described on Attachment B to this notice. Please note, in addition to this list of 219 subsidized In-flight Passings, Shentel also included an additional 560 non-subsidized and unserved passings that Shentel will also complete.

3. Shentel has completed construction to 22 additional subsidized passings. However, Shentel is still awaiting both a National Park Service – Blue Ridge Parkway crossing permit and a Norfolk Southern railroad crossing permit to complete connectivity to these 22 passings (the "Permit Pending Passings"). These Permit Pending Passings are further described on Attachment C to this notice. Shentel will complete connectivity to the Permit Pending Passings shortly after receipt of these permits.

As it relates to these three exceptions, please note that Shentel, when combined with the 2021 VATI Agreement, has successfully delivered broadband service to an additional 2,270 previously unserved and non-subsidized County passings as part of this project. Shentel will not be reimbursed by the County nor the State for these 2,270 non-subsidized passings.

Over the next several months, Shentel looks forward to working with the County and the State on meeting the contractual requirements of Final Completion Certification as described below:

1.3 Final Completion Date – the date the County and the State take official action to accept that the Project is totally complete as required by this Agreement such that a Certificate of Final Completion has been issued and all post construction and post closeout inspections have been completed by the Company such as final site clean-up and restoration, the submission of a final progress report, the submission of a project closeout report, and the submission of final construction invoicing. The Final Completion Date shall be within three (3) months of the Substantial Completion Date. Either party may request a thirty (30) day extension of the Final Completion Date provided such request is made in writing at least fifteen (15) days prior to the original Final Completion Date, and provided such notice documents the reason for the extension.

Please let me know if you have any additional questions or concerns.

Sincerely,

Daniel J. Meenan
Vice President

RE: Notice of Substantial Completion Date – Shentel 2021 VATI Project

Dear Ms. Smith:

Per section II of the *Franklin County and Shenandoah Cable Television, LLC 2021 Virginia Telecommunications Initiative Franklin County and Financing and Performance Agreement (VATI)* dated January 17, 2023 and amended on August 28, 2024, ("the Agreement"), Shenandoah Cable Television, LLC ("Shentel") hereby provides Franklin County ("County") notice that November 6, 2025 shall be the substantial completion date.

Shentel's contractual commitment for this Agreement is to provide the Service(s) to 612 subsidized passings (inclusive of 195 vacant lots). As of the date of this letter, Shentel has substantially completed construction of the Services to the subsidized passings associated with this Agreement. Thus far, 116 County residents have subscribed to Shentel broadband service, which equates to a 19% take rate.

All of these passings meets or exceeds the Service(s) described in section II of the Agreement. This passing and take rate information shall be supported by the submittal to the County of Shentel's 2025 monthly CAMS report for October, 2025. Shentel looks forward to working with the County and the State over the next several months to provide further supporting documentation required of the Agreement.

This notice is conditioned on the following exception:

1. Shentel was denied access to 1 subsidized passing by the applicable property owners. This "denied access" passing was disclosed to the County as it occurred. This "denied access" passing is further described on Attachment A to this notice.

As it relates to this one exception, please note that Shentel has successfully delivered broadband service to an additional 106 previously unserved County locations as part of this project. Shentel will not be reimbursed by the County nor the State for these 106 non-subsidized passings.

Over the next several months, Shentel looks forward to working with the County and the State on meeting the contractual requirements including all post construction and post closeout inspections, submission of a final closeout report and submission of final invoicing.

We sincerely thank you, the Franklin County Broadband Authority, and County Staff for all your support. Please let me know if you have any additional questions or concerns.

Sincerely,

Daniel J. Meenan
Vice President
